

TECHNISPAN.

SPECIALIST UNDERDECK ACCESS.

Span

A HAKI COMPANY

Introducing Span Access Solutions— a HAKI Group company that specialises in unique innovative access methods that gain safe working access to difficult and awkward locations.

The Goal

To provide customers with a safe, cost-effective and alternative access solution.

Using the TechniSpan platform, combined with HAKI Universal systems, we give customers the means to carry out installation, maintenance or other remedial works. Working with our customers every step of the way, we create a unique method to work access challenges where we have a track record of bringing assets back on line quicker than using conventional access methods.

Unique Platforms

TechniSpan provides an innovative engineered access solution for the replacement of traditional under-deck and suspended scaffolds, while offering interconnection compatibility to all main scaffolding systems.

The TechniSpan system is ideal for under-deck access, bridge maintenance, jetty construction and repair. The adaptable modules are designed to accommodate piers, bearings, arches, trusses, soffits, suspension cables, hangers & other challenging obstacles.

Our Strategy

With a key focus on Offshore/Onshore Oil & Gas, Renewable Energy and General Infrastructure Support, our commitment is to provide our customers with a safe and appropriate access solution.

We support the overall project need or specifically the access solution, as and when required. In doing so, we employ different techniques for providing safe, optimum and cost-effective solutions.

Span and HAKI constantly work with customers and our in-house design team to develop and enhance new and innovative ideas to challenging access solutions.

Customer Focused

Span and HAKI ensure that all safety criteria are met and that you get an engineered solution suitable for the application. Listening to all your requirements and concerns regarding access, together we will create a unique solution that works for you and will save you time and money.

TechniSpan Projects

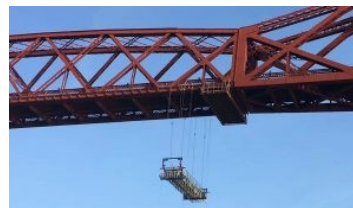

EnQuest (formerly BP) Magnus Offshore Maintenance:

Span Access Solutions (now a HAKI company) specified the use of the HAKISPAN suspended access platform and provided client access with a suspended staircase, to keep EnQuest Magnus operational whilst one of the dead-weight supports of the NLGP was repaired.

Forth Road Bridge Repairs:

Span Access ensured rapid installation of highly anticipated replacement expansion joints on the Forth Road Bridge.

TechniSpan mobile gantry for Forth Rail Bridge:

Mobile access solution, TechniSpan, enabled steelwork to be repaired on the iconic Forth Rail Bridge at significantly lower costs.
